Environmental Policy

As a provider of information technology solutions and services, we, INFO WORLD, believe we have the obligation to protect the environment, including to prevent the pollution. We commit to simultaneously meet all legal and regulatory requirements as well as the voluntary commitments we adhere to.

In order to ensure that these commitments are implemented, we have established environmental objectives based on significant environmental aspects as to reduce the impact of our activities on the environment.

To achieve the desired results, we have established and implemented an environmental management system in line with the requirements of the ISO 14001 standard, a system that we are committed to continuously improving in order to increase our environmental performance.

Daniel NISTOR, Executive Manager
