OH&S Policy

As a provider of information technology solutions and services primarily to health service operators, we, INFO WORLD, believe that we have the obligation to prevent employees' professional injuries and illnesses and to comply with all legal requirements as well as other requirements to which we adhere, based on our own Occupational Health and Safety (OH&S) risks.

To ensure that these commitments are implemented, we have established a set of OH&S objectives that we regularly review. These objectives relate to staff health surveillance, staff awareness, communication and compliance with requirements, in order to maintain a healthy and safe work environment.

To achieve the stated desired results, we have established and implemented an OH&S management system that meets the requirements of OHSAS 18001 standard, a system that we are committed to continuously improving in order to increase our OH&S performance.

Daniel NISTOR, Executive Manager
